

01:07 Mario Anderson starts off the keynote with locks and can't open them.
02:15 Music is like a "Stomp" type group: Street beats

07:03 Adobe Student Voices Presentation.
08:54 Youth Voices

10:27 Holly Jobe announces her rise to the Presidency.

12:01 Interesting how the "flipping" of school is coming around as a theme this year.

14:30 ISTE is releasing a paper on coaching.

20:27 Dr. John Medina

23:35 Crossing the brain is scientific bunk.

58:20 Question and answer session.

1:03:00 20% to 110% boost with 150 mins of aerobic exercise.

1:04:31 Does the use of Google change the brain?

1:05:01 Yes, but we don't know how. Look up crypto chrome.

The brain research being done is only scratching the surface. To correlate it to education is making leaps not supported by neuroscience yet.

Note: This guy is from Seattle Pacific University. A Free Methodist affiliated institute. He dropped the "frickin'" bomb
